DETAILED ACTION***Allowable Subject Matter***

1. **Claims 1-15 are allowed.**
2. The following is an examiner's statement of reasons for allowance: Both independent claims 1 and 13 describe a device with an unobstructed, valveless, open-bottom motorized curved shaped pump with vanes that can rotate in either direction to fill one of two intake pipes that rise vertically out of a vat of heated food or drink. Pumps that have vanes that can be driven in either direction are in the prior art (see US 4,331,295, Warihashi). Pumps that drive fluid up vertically are in the prior art (US 5,793,294 Schepka). Containers of electrically heated food or drink are in the prior art (US 4,094,446 Brutsman). Pumps that have the outlets at various angles with respect to the vanes are in the prior art (US 3,773,432 Chow et al.). But the surveyed prior art does not have a device or a valid combination of devices that have an open-bottom sump pump feature that rotates vanes in one of two directions to push material up one of two vertical pipes to the respective outlets for a food or drink heated vat, and there is no valid reason to combine the disparate art because sump pumps almost always pump to one and only one vertical pipe, the pumps in the prior art almost always have valves, and almost all the outlets are not placed tangentially to the vanes of the pump impeller, not even for food or drink, presumably because valves help improve the cleanliness of most food or drink devices, which is presumably solved in the this application because the heated food or drink can simply be heated above the temperature that contamination is possible.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments, see Applicant's arguments, filed May 7, 2009, with respect to the rejection of claims 1-11 have been fully considered and are persuasive. The earlier rejections and objections of the Examiner's Non-Final Rejection of 11/7/2009 are hereby withdrawn.
